

EUROPEAN TECHNOLOGY SUMMIT

Kristjan Korjus
Senior Software Engineer
Starship Technologies

Kristjan Korjus is the machine learning team lead at Starship Technologies, responsible for making their autonomous delivery robots intelligent.

In his spare time, Kristjan led a successful GitHub project where they were first to replicate the notorious Atari playing AI by DeepMind and he is also co-author of the 3rd best selling book in Estonia in 2014 "Bedside Reading About Mathematics".

He is finishing a Ph.D. in Machine Learning and holds a first class master's degree in mathematics from The University of Manchester.
